About This Game

In 'n Verlore Verstand you will be transported to a reality of dreams and nightmares. What will you discover about yourself in this journey through the subconscious?

In these realms of the unknown, you must travel through labyrinths of memories to eventually find your way to your own truth.

Features:

- Abstract adventure.
- Engaging dream-like environments.
- Mysterious puzzles.
- Platforming
- Exploration
- Oculus Rift integration.

Title: 'n Verlore Verstand
Genre: Adventure, Casual, Indie
Developer:
Skobbejak Games
Publisher:
Skobbejak Games
Release Date: 1 Feb, 2016

b4d347fde0

Minimum:

OS: Windows 7 32-bit

Processor: Dual Core

Memory: 2 GB RAM

Graphics: Nvidia Geforce 8800 OR ATI Radeon HD 3870 OR equivalent/higher

DirectX: Version 9.0c

Storage: 2 GB available space

Sound Card: Direct X compatible

English, French, Italian, German, Arabic, Bulgarian, Czech, Danish, Dutch, Finnish, Greek, Hungarian, Japanese, Korean, Norwegian, Polish, Portuguese, Romanian, Russian, Simplified Chinese, Swedish, Thai, Traditional Chinese

The cons: Sorry but there are some issues with this game. There are no save areas so when you come back you can start where you left off! And what is it with the truck levels? I find its random when you can finish it. The trucks headlamps are sometimes on the right side of the vehicles.is that a glitch? You also have a limited setup area where you cant take the music off, resolution choice..etc

The pros: I like the ideas and the levels , The Graffics are ok, what is the point of collection those colored flowers?
Can you get a secret level anywhere?

I clicked no because of the glitches.... Crashes if you put it in fullscreen. You can walk through solid objects. It's wierd and there aren't really any puzzles, just a series of stations you need to touch. Weak.. 'n Verlore Verstad is a fine looking game, but the total lack of story, narrative, and overall structure make it uninteresting to me. It's simply a series of mild puzzles with no rhyme or reason as to why one would want to complete them. For me, an adventure game is crucially bound together by the story, even though the story can (and probably should) be mostly inferred from in-game clues. I got bored with 'n Verlore Verstad by the time I hit the floating rocks. If there were a decent (musical) soundtrack, I likely would have played longer, but there are just a few washes of audio atmosphere. "Why am I here? Where am I going? Why am I going there (besides crippling boredom)?" -- these are all questions that I was unable to answer in-game before I got bored enough to quit.. :(having trouble getting it working with the oculus and windows10 :\ keeps crashing managed to get it working in windows7 mode but no vr. 'n Verlore Verstand is like a book you stay up all night to finish because you can't stop reading it. So I'm going to go ahead and give it a positive before I change my mind again. This game drives you absolute bonkers in the best possible way - hence the title. And while I understand all the bad reviews, the devs are very responsive and all the issues have been recently fixed. I played and replayed on different platforms and everything works fine.

'n Verlore is more or less a 'platform' puzzle game and if you're going for the puzzle part (flower collecting, secret level location etc.), it can be very challenging and frustrating. People give up about halfway through. I personally suck at platforming so it took me longer to complete but if you don't, you're good to go. The jumps have to be very precise too because you can get stuck in certain places.

Personally, ambience (in any game) is very important to me and I think all levels here were superbly done. The soundtrack is fantastic and adds that extra crazy to the game. So if you are a fan of weird abstract stuff like myself, this game is definitely for you.

I wish more people bought it, really. Symbiosis of graphics, sound and challenge has been achieved.

Keep in mind:

- there is no story\story open to interpretation
- save game is not strong AT ALL
- you will probably consider jumping out of the window at some point

Good Luck :)

I played through this game in one sitting, and I loved every second of it. The game is visually astounding. The surroundings gave the game a certain artistic touch, that just resonated the time and effort put into this game. The puzzles were challenging in their own respect, but not impossible by any means. I loved the way you hopped from one dream\nightmare to the next once you completed a sequence. Without further ado, I will introduce some pros and cons!

(Note: I did not play this with virtual reality, so my review is without that aspect.)

Pros:

- Game is visually astounding
- The puzzles are fun and different in their own respects
- It has a lot of potential for a great storyline as time goes on
- Full Controller Support FTW (personal preference for games like this)

Cons:

- Game does not have any checkpoint features, which means one slip up and you are doing the WHOLE puzzle again (The devs responded to the review saying they are going to work on a checkpoint system.)
- There is not a lot done due to early access, so you can only play four levels as of right now.
- The pricing is a little hefty for only four levels, but obviously it is early access

That just about does it for me. I personally loved the game. There seems to be a lot of potential here for growth. I look forward to seeing where the developers take the game, and I hope that there is a great deal more to come. If you would like to check out some gameplay of it before making your purchase, then check out my Youtube video on it. I only have the first part up currently, but more to come. I hope you guys enjoy the beauty of the game as much as I did, and I highly recommend supporting this indie developer to see the project grow. That does it for me guys :)!

Youtube video [here](#)

[Part 2 to the video here](#) . I havent played much of it so far but i can tell you that this is a very well designed game.

Pros:

- Great graphics. Very realistic.
 - Nice ambiance (music, sound etc).
 - Ease of controls.
 - Variations of lvl's.
- and
- The ability to suck one's mind into the game. You can really lose yourself in it lol.

Cons:

- Difficulty in some lvl's bare the on the edge of unreasonable at times.
- Occasional bugs. (getting stuck sometimes on NOTHING lol)
- Lack of story. (SOMETHING is better than NOTHING) i mean is your character in a coma and trying to fight back to consciousness? Is your character dead or something? Is it a nightmare? What does the Tree symboliaze?

(although most of these cons can be solved by me playing some more of the game and HOPE a story emerges lol)

either way i am very pleased with this purchase and it deserves more attention :)

. Did not enjoy one bit. I was hoping for puzzles, and instead got mazes with utterly incomprehensible objectives and graphics that gave me a headache. Platforming parts were ruined by weird jump physics that made it very difficult to gauge how far I could or could not jump. Thoroughly disappointed.. Halfway through the game there is a huge bug that makes the game unplayable, the objects you are supposed to be platforming on lose their textures. So, unless you enjoy platforming on invisible objects do not buy this game at this time.. Die spelejtie gaan nerens nie.

This game is not a game, and as such, it's not about a lost mind, it just does not go anywhere at all.. Puzzles are extremely easy and gameplay is linear. Sometimes it seems like there might be other ways for you to do the (also extremely easy) platforming, but there isn't. For as far as I played into it, there was no real story, just abstract levels meant to represent one without actually giving you anything substantial.

While the platforming was easy, the settings for running and jumping are way too floaty and the platforms themselves don't feel

especially solid--either you smash into a platform and glitch on top of it, or you land on it and manage to slide off--which gave platforming portions a sense of false difficulty.
